

SAFRAN AIRCRAFT ENGINES

Planet (Engine Shop Visit)

CUSTOMER PROFILE

Safran Aircraft Engines (SAE) is one of the world's leading manufacturers of aircraft and rocket engines. SAE also offers a complete range of services to airlines, air forces and other operators: **engine maintenance, repair and overhaul (MRO)**. SAE and 2MoRO have worked together for more than 10 years.

CHALLENGES / NEEDS

- An add-on / software to **complement SAP® ERP** with functionalities dedicated to complex components.
- Perform **MRO process key functionalities**, such as inventory, cockpit inspection, logistics decisions & configuration controls.
- Perform **life limits management, remaining potential** calculation & alerting
- **Mobile functionalities** on inspection processes

AERO-WEBB

- ✓ +1000 users
- ✓ Live on 6 sites in 4 countries (France, Belgium, Mexico, Morocco)
- ✓ Live since 2009

BENEFITS

SAE uses key functionalities of Aero-Webb®:

For **Inspector Work Bench** (MRO process)

- Workscoping, Inventory & Sentencing
- RFID tracking
- Mobile access

For **Engineering data**

- Link with SAP iPPE (IPC) and SAP PM (Tasks Structure)
- Update / Consult Technical Referential

For **Fleet Management**

- Life limits management
- Residual potential calculation
- Applied configuration
- Link with SAP® PM (Equipments structure and measures)
